

Solar panel fixing bottom trough and price

Overview

How to fix solar panels at an angle?

At INDEX you can find a wide range of fixings and accessories designed specifically for this purpose: Adjustable triangles. They are ideal for fixing solar panels at an angle and are mainly made of steel and aluminium. They are used as a complement to the support and help to regulate the inclination of the panels on the roof.

Why do solar panels need fixings?

The fixings for solar panels have a very clear purpose: to support the photovoltaic panels by means of a firm and resistant anchorage capable of withstanding any environmental circumstance.

What are the best anchors for solar panels?

Direct fixing. The direct fixing anchors are perfect for joining solar panels in a fast, safe and efficient way. Within this category, on the INDEX website, you will find screws with washers and rivets made of resistant materials that facilitate their installation. Staples.

What do solar panels need?

Staples. Staples are an essential element for reinforcing the fixing of solar panels and also facilitate the electrical connection between the panels and the supporting structure. They are valid for intermediate areas as well as for the ends of the solar panels. Adjustable accessories.
