

# Solar panels after terrace pouring

## Overview

---

Where should solar panels be installed on a terraced house?

On terraced houses, because of the limited space, the solar panels will need to be installed either on the front or the back of the property. One thing you should consider when making this decision is not the aesthetics, but the side of the roof that will get the most sun.

Are terraced homes a good choice for solar panels?

But, as the solar power revolution grows, more and more terraced home owners are opting to install solar power systems in their homes. In fact, terraced houses are quickly becoming one of the most popular property types for solar panel installation, nationwide. So, the simple answer to the question, is yes! But what are the considerations?

.

Can solar power be installed on a terraced house?

So, the simple answer to the question, is yes! But what are the considerations?

Terraced houses typically have less roof space than a semi-detached or detached property, especially when the space is also occupied with a chimney. This means that some of the larger solar power systems, with an output above 5kw, simply wont fit in the space.

Can a solar PV plant be installed atop a building terrace?

Here was an opportunity to install a Solar PV Plant atop a building terrace, but without letting go of precious terrace space that was needed to be utilised for other activities – a classic case of having your cake and eating it too !
