

Solar panels are available in several sizes

Overview

What are the dimensions of standard solar panels?

Most solar panels are about 1.5 inches thick. The typical classification of solar panel sizes is based on the solar cell size, but it's not very useful for most calculations.

What are the different types of solar panels?

Solar panels are available in several standard sizes, with the most common being 60-cell and 72-cell configurations. These dimensions are based on the number and arrangement of photovoltaic (PV) cells within the panel. 60-cell solar panels are popular for residential installations due to their manageable size and weight.

Which solar panel size should I Choose?

For homes, the most common solar panel sizes are 60-cell and 72-cell panels. They offer various options to suit different needs and constraints. The right choice depends on a balance of energy requirements, available space, and your budget. [Why Do Two Solar Panels With the Same Wattage Have Different Sizes?](#)
