

Solar panels come in many sizes

Overview

What are the dimensions of standard solar panels?

Most solar panels are about 1.5 inches thick. The typical classification of solar panel sizes is based on the solar cell size, but it's not very useful for most calculations.

How do I choose the right solar panel size?

The solar panel size directly affects how much power your system can produce, how many panels you need, and whether your available roof space can support the installation. Choosing the proper system is not only about the solar panel dimensions. You should also consider wattage, number of cells, layout possibilities, and energy consumption.

What size solar panels do I Need?

They can range from 77 x 39 inches to much bigger, custom-sized panels ideal for the very high, consistent energy needs of a factory or an office building. Solar panels come in three main cell sizes: 60-cell, 72-cell, and 96-cell. The most commonly used sizes for residential and commercial purposes are 60-cell and 72-cell.

What are the dimensions of a 96-cell solar panel?

96-cell solar panel size. The dimensions of 96-cell solar panels are 41.5 inches long and 63 inches wide. That's a 41.5x63 solar panel.
