

Solar panels installed for home use in Morocco

Overview

Is Morocco ready for solar energy?

Morocco's outlook for solar energy is as bright as its desert sun. The government's latest roadmap, unveiled in March 2025, targets an installed solar capacity of 10 GW by 2030—an ambitious leap from the current 3.5 GW. New projects are underway in regions like Tata and Zagora, where high solar irradiance promises optimal yields.

How much solar energy does Morocco use?

As of early 2025, fresh figures from the Moroccan Ministry of Energy show that solar energy alone now accounts for around 20% of the nation's total electricity production. This marks a dramatic increase from just a decade ago, when Morocco relied heavily on imported fossil fuels.

Why is Morocco deploying solar panels?

Morocco is not just deploying solar panels—it's pushing the technological envelope. In 2023, MASEN launched a pilot project integrating advanced lithium-ion battery storage with the Noor Midelt solar plant, enabling reliable power delivery during cloudy days and nighttime hours.

Does Morocco have a solar plan?

Morocco is planning USD 13billion expansion of wind, solar and hydroelectric power generation capacity which would catapult the share of renewables in the energy mix to 42% by the year 2020, with solar, wind and hydro each contributing 14%. Moroccan Solar Plan
