

Solar perovskite solar container battery

Overview

Can perovskite solar cells be integrated with energy storage devices?

Perovskite solar cells have emerged as a promising technology for renewable energy generation. However, the successful integration of perovskite solar cells with energy storage devices to establish high-efficiency and long-term stable photorechargeable systems remains a persistent challenge.

How can n-i-p-type perovskite solar cells improve battery performance?

In this work, we significantly improve the rate performance of the battery electrodes by asphalt-derived carbon coating, and strategically couple high-efficiency n-i-p type perovskite solar cells with either aqueous lithium or sodium (Li/Na)-ion batteries, for the first time, to create a low-cost and high-performance photovoltaic battery system.

Are perovskite solar cells reproducible?
