

# **Solar power generation and energy storage wholesale in Somalia**

## Overview

---

What is the energy supply in Somalia?

Energy supply Somalia's energy capacity is around 344 MW, mainly generated from imported diesel fuel. However, some ESPs have installed grid-connected solar PV systems. In Table 3, Energy supply and tariffs in the Federal Member States have seen a 36% yearly increase in the past six years.

Which companies provide off-grid solar energy solutions in Somalia?

In addition, several other companies exist that provide off-grid solar energy solutions, including Blue Sky, Solargen, Delta, and others. Financing represents the biggest obstacle to Somalia realizing its potential as a hub for renewable energy. International development partners are providing support in the solar energy sector.

Can Somalia harness solar energy?

This study explores Somalia's energy profile and the potential for harnessing solar energy. The installed photovoltaic capacity was found to be 41 MW and contributed 11.9% of the total electricity generation. A case study on a solar power microgrid system in Bacadweyene, Somalia, is also presented.

Does Somalia have solar energy?

Solar Energy: Somalia has high renewable energy potential. Solar power could generate an excess of 2,000 kWh if the country reached its full capacity. Recently there has been progress in developing solar energy systems in the country by private sector electricity companies.
