

Solar power station for home in Jordan

Overview

What is the solar energy potential in Jordan?

The solar energy potential in Jordan is enormous as it lies within the solar belt of the world with average solar radiation between 4 and 8 KWh/m², which implies a potential of 1400-2300 GWh per year annually.

Why does Jordan need a solar PV installation & maintenance service?

Since Jordan started the solar PV installation in 2012, the demand for solar PV operation and maintenance (O&M) services increased, driven by aging systems requiring inverter replacements (every 8-10 years) and system optimization.

Where is the first solar-powered charging station in Jordan?

Jordan inaugurated its first solar-powered charging station for electric cars in February 2012. Located at El Hassan Science City (EHSC), the station is considered the first step towards promoting solar-powered vehicles and building more solar-charging facilities on the streets of Jordan.

How many solar panels are installed in Jordan?

According to annual reports by Jordan's grid operators, the total installed on-grid solar PV capacity reached 2,073.86 MW by the end of 2024. This capacity is divided as follows: Distribution System Operators (DSOs): 1,081.86 MW across 74,145 projects. Transmission System Operator (TSO): 992 MW. The largest DSO-managed installations were by:

Solar power station for home in Jordan

Home

The optimal partner for installing solar energy systems, storage, and electric vehicle charging, providing a comprehensive solution for home energy that helps you reduce electricity bills and ...
