

# **Solar power station for sale in Austria**

## Overview

---

What is solar energy?

Solar energy refers to heat and radiant light from the sun that can be harnessed with technologies such as solar power (used to generate electricity) and solar thermal energy (used for applications such as water heating). The Austrian solar energy market is segmented by technology and end-user.

Where is the largest solar power plant in Austria?

Construction began on Austria's largest solar power plant, a 120 MW solar park, in Nickelsdorf, a small town in eastern Austria [in June 2022]. It is part of a hybrid wind-solar project with a 164 MW wind farm.

Will the solar PV market grow in Austria in 2021?

The solar PV segment is likely to witness considerable growth in the Austrian solar energy market during 2021. The total renewable energy generation in Austria reached 13.3 TWh in 2021, and the total installed capacity of renewables was 22,014 MW in the same year.

How many solar panels will Austria install by 2030?

According to Austria's National Energy and Climate Plan (NECP), the Austrian government is committed to installing 1 million PV systems by 2030. This is a substantial increase from the target of 100,000 roof-mounted PV systems under Mission 2030. Thus, this factor is expected to create ample opportunities for the solar market.
