

# **Solar power station in China in France**

## Overview

---

Within 6 months of announcing its plans to expand its manufacturing footprint to Europe, Chinese solar PV manufacturer DAS Solar has launched the construction of a 3 GW solar module production facility in France. Does France have solar power?

Only in 2008 did France see a significant increase in solar PV installations. From a low point in 2009 to a high point in 2011, PV capacity nearly tenfold. Solar power in France grew steadily in 2015, reaching a total photovoltaic capacity of 6.6 gigawatts by the end of the year, delivering 6.7 Terawatt hours of electricity.

What are the most significant solar power farms in France?

We'll be taking a close look at 15 of the most significant solar power farms in France below. Built by French renewable energy giant Neon, the Cestas Solar Park is France's largest operational solar project at the moment with an enormous 300 MW of total solar capacity.

What is the largest solar plant in France?

The Gabardan Solar Park is a photovoltaic power plant in France with a capacity of 67.5 megawatts (MW). It features 872,300 thin-film PV panels from First Solar, as well as a 2 MW pilot plant utilizing 11,100 solar trackers. All Largest Solar Plants Here is a list of the largest France PV stations and solar farms.

Is residential solar PV a big market in France?

While residential solar PV is by no means a small market in France, most of the country's solar capacity is derived from large-scale solar utility projects. We'll be taking a close look at 15 of the most significant solar power farms in France below.
