

Solar solar container power supply system warranty period

Overview

What is a solar panel warranty?

Warranties are established to protect investments and ensure your system's performance. A solar panel warranty is a guarantee that either a manufacturer or installer gives a customer ensuring the solar panels will function as sold for a period of time. A typical warranty will offer protection for panel reliability, production and more.

What warranties does a solar system have?

Today, most home solar energy systems include three primary coverages: product warranties, performance guarantees, and installation warranties. 1. Product warranties A solar product warranty covers the physical components of your system, such as the panels, inverters, or batteries.

How long does a solar equipment warranty last?

Most equipment warranties ensure about 10-12 years without failure. When making a large financial investment for a solar energy system, it is important to understand what is covered in your equipment warranty in order to maximize the benefits of your system.

Should you buy a solar warranty?

For this reason, solar warranties from manufacturers with labor reimbursement included can create the most long-term value for PV owners, with fewer potential costs incurred during future system maintenance.
