

# Solar water pump export enterprise

## Overview

---

What is the global solar water pump systems market?

Global solar water pump systems market is segmented into by product type, power rating, design type, application, and region. By product type, the submersible segment is expected to dominate the market over the forecast period owing to its high efficiency and ability to pump from greater depths as compared to other pumps.

What are the key drivers of solar water pump systems market?

The key drivers of this market include government subsidies and incentives, decreasing cost of solar panels, rising electricity prices, and increased groundwater depletion. Global solar water pump systems market is segmented into by product type, power rating, design type, application, and region.

Who makes solar water pumps?

WBS began producing water pumps in 1998. In 2008, we independently developed and produced solar water pumps. We have OEM production for more than 200 solar pump dealers around the world. Over the past 10 years, we have produced more than 150,000 sets of solar water pumps that have been exported to other parts of the world.

What is a solar water pump?

Solar water pumps are systems designed to operate on solar power by using photovoltaic panels to convert sunlight into electricity to pump water. These systems are advantageous as these eliminate the need for grid electricity or diesel generators and provide cost-effective and reliable water supply.
