

# **Somaliland rural solar panels**

## Overview

---

Can solar energy be used in Somalia?

In a real case study, a solar photovoltaic system in Somalia achieved a performance ratio of 70.8%. Recommendations have been provided to increase the utilization of solar energy in Somalia. Based on the extensive review conducted by the authors, no previous study has been performed on the solar energy potential in Somalia.

Why should I switch to solar energy in Somalia?

Solar panels convert sunlight into electricity, which can be used immediately or stored in batteries for later use. Our systems are designed to withstand Somalia's hot climate and perform efficiently even on cloudy days. What are the benefits of switching to solar energy for my home or business?

.

Can Somalia harness solar energy?

This study explores Somalia's energy profile and the potential for harnessing solar energy. The installed photovoltaic capacity was found to be 41 MW and contributed 11.9% of the total electricity generation. A case study on a solar power microgrid system in Bacadweyene, Somalia, is also presented.

Which companies invest in solar energy in Somalia?

Since 2015, the most significant investment in solar energy in Somalia has been produced by leading ESPs. The companies, which include BECO, NESCOM, and Sompower, have invested in the solar system project in different capacities, with BECO producing the most significant investment in the Somali energy sector.
