

# **South America Bifacial Solar Panels**

## Overview

---

What is the global bifacial solar market size?

"The quality of research they have done for us has been excellent." The global bifacial solar market size was estimated at USD 16.07 billion in 2023 and is expected to grow at a CAGR of 15.1% from 2024 to 2030.

What is the bifacial solar market report?

The report's goal is to provide industry stakeholders with a comprehensive analysis of the Bifacial Solar market. The report analyses complicated data in simple language and presents the past and current state of the industry, as well as forecasted market size and trends.

What is the market outlook for bifacial solar panels & solar modules?

By 2030, the commercial segment is expected to hold the largest share of the global bifacial solar market. In the Commercial sector, Bifacial Solar Panel/Bifacial Solar Module is expected to grow at a CAGR of xx% during the forecast period (2024-2030). Because of increased demand for electricity in the commercial sector during peak hours.

Which countries are leading bifacial solar market?

Because of the large installed base of solar panels, the bifacial solar market in India and China is expected to grow at the fastest CAGR during the forecasted period. In the Middle East & Africa, the UAE is expected to be one of the leading markets for bifacial solar modules.

## South America Bifacial Solar Panels
