

# **Southern Europe Double Glass Module Manufacturer**

## Overview

---

What is a glass-glass PV module?

**Glass-Glass PV Module** In the past and currently, the standard photovoltaic module has been manufactured using 3.2 -4mm glass on the front and a polymer-based insulating back she. ViaSolis is an international manufacturer of PV glass and provider of solar energy solutions. The company operates one of the most advanced production facilities in EU.

What is solid bifacial framed glass-glass solar module?

**SOLID Bifacial Framed glass-glass solar module** offers enhanced structural integrity, making it perfect for carports and other robust installations. This glass-glass, transparent module with a 3.2 mm glass and framed design ensures long-lasting performance. For a seamless look, a option is available.

What is a glass glass solar module?

**Glass glass solar module** is a long lasting and ultra resistant to any weather conditions Building Integrated Photovoltaics solution. BIPV solar panels can be used as an additional power source and alternative material in architecture to achieve future design for a comparable to standard materials price.

What is glass-glass bifacial module?

**Glass-glass module** assures crop protection against extreme weather conditions such as hail, heat waves, frost, and erosion. **SOLID Agro** has higher light transmission (40%) for crops under the module. **Glass-Glass Bifacial module** is more resistant to the damage from ammonia (Agri) and salt mist (coastal regions).
