Overview

What is the market energy storage in Spain?

The market energy storage in Spain, particularly in relation to the BESS systems (Battery Energy Storage Systems), is undergoing a dynamic and accelerated evolution. This transformation is driven by the growing need to integrate renewable energy sources into the electricity grid, improve supply stability and optimize energy use.

How will Spain increase its energy storage capacity?

Spain has launched an ambitious €700 million (around \$796 million) program to increase its energy storage capacity. This plan will add 2.5 to 3.5 gigawatts (GW) of storage. It includes pumped hydro, thermal energy storage, and battery systems.

Why is energy storage a problem in Spain?

Despite having a clear strategy and ambitious goals in the sector of energy storage in Spain, subsidies and direct aid specific to these technologies remain limited. This creates a significant barrier for companies and individuals interested in investing in energy storage solutions.

What is E1 thermal storage in Spain?

E1 thermal storage Solar thermal power is another emerging technology in Spain, especially in the context of solar thermal power plants. This method allows heat to be stored in the form of thermal energy to be converted into electricity during the night or during cloudy periods.
