

St John s Local Energy Storage Power Company

Overview

Who is Saint John energy?

Saint John Energy provides the people of Saint John with the power they need to heat their homes, run their businesses and fuel industrial growth. As Saint John's premier provider of excellence in energy solutions, we serve 36,500 residential, commercial and industrial customers.

How do batteries help Saint John energy save energy?

The batteries, which provide a combined 6.95 megawatts of storage, play a key role in shifting energy resources to help Saint John Energy avoid peak demand, storing enough electricity to power 3,100 homes for two hours. In May, we became the first Canadian-based company to partner with British software firm Kraken Technologies.

Why did Saint John energy add a battery storage site at Burchill?

Saint John Energy decided to add a battery storage site at Burchill partly due to the success the company has seen with their first Megapack project. Installed in 2020, the company was expecting to see large savings, and the Megapacks delivered just that, with Saint John Energy saving over \$109,000 in the first year of operation.

Is Saint John energy a good utility?

To put this into perspective, Saint John Energy has one of the highest net promoter scores among electrical utilities in Canada. This score shows a customers' willingness to recommend a utility's products and services (with -100 being the worst possible score and +100 being exceptional).
