

Steel structure roof solar tiles

Overview

What is a solar roof?

Solar Roof is comprised of both glass solar tiles and steel roofing tiles. Glass solar tiles produce energy, while architectural-grade steel tiles add longevity and corrosion resistance to your roof. Both are durable, strong and engineered for all-weather protection.

What are solar panel roof tiles?

Solar panel roof tiles are small photovoltaic panels shaped to look like normal roof tiles. They absorb sunlight to convert it into electricity in the same way that standard solar panels do.

How do you install solar panels on a tile roof?

To install solar panels on a tile roof, solar installers attach solar racks by taking out individual tiles and cutting or drilling small holes in them. Alternatively, they place similarly shaped tiles in between the rows of panels to maintain a neat appearance.

Are solar roof tiles a good choice?

Glass solar tiles produce energy, while architectural-grade steel tiles add longevity and corrosion resistance to your roof. Both are durable, strong and engineered for all-weather protection. With a 25-year warranty, Solar Roof will continue to produce clean energy and protect your home for decades to come.
