

Stockholm Solar Ecosystem

Overview

Can ecovoltaics increase biodiversity in Sweden?

The concept of ecovoltaics is still very young, especially in Sweden, which also can be seen in the noneconomic incentives that are in place. The study shows that there is an increasing awareness and interest for biodiversity and a desire to work towards increasing biodiversity in Sweden.

Can solar parks increase biodiversity in Sweden?

The study shows that there is an increasing awareness and interest for biodiversity and a desire to work towards increasing biodiversity in Sweden. The interviewees see solar parks as a good possibility to enhance biodiversity.

Why do we need more solar farms in Sweden?

Along with a decrease in biodiversity, nature's supply of ecosystem services decreases, as well as our chances to meet a number of Sweden's national environmental goals and several SDG's. This project has mapped existing larger solar farms and planning practices in Sweden (2021) and the international state of knowledge.

What is the 'eco-quarter' of Stockholm?

On the edge of Stockholm's urban park, the 'eco-quarter' of Norra Djurgårdsstaden, Stockholm Royal Seaport, is using an old gasworks to build thousands of eco-friendly homes complete with biogas produced from food waste, as well as providing electric car chargers and planning a new tram line.
