

Subsidies for new energy storage power stations in Ethiopia

Overview

Does Ethiopia have a reliable electricity supply?

Despite its leadership in renewable energy, nearly 50% of Ethiopia's population still lacks access to reliable electricity.

Who owns the energy grid in Ethiopia?

It is the biggest player in the Ethiopian energy sector. EEP owns and operates the national power grid, including all high-voltage lines (over 66 kV), all the associated substations and nearly all the power stations on the grid (some power plants belong to the state-owned Ethiopian Sugar Corporation).

What is Ethiopia's energy strategy?

Ethiopia's energy strategy is strongly anchored in hydropower, but long-term resilience depends on accelerating the development of solar and wind energy. To avoid overreliance on a single source, the government must fast-track grid integration and enhances private sector participation through Independent Power Producer (IPP) schemes.

Will Ethiopia quadruple the price of electricity?

The Ministry of Water and Energy of Ethiopia (MoWIE) has announced plans to quadruple the price of electricity, arguing that the state currently receives much less revenue than it spends on providing electricity.

Subsidies for new energy storage power stations in Ethiopia

National Roadmap for Scaling Up Productive Use of ...

Nov 19, 2025 · Acknowledgements The National Roadmap for Scaling Up Productive Use of Renewable Energy (PURE) in Ethiopia was developed by the Ethiopian Solar Development ...
