

Sucre Energy Storage Project Subsidy

Overview

What is Sucre (sugarcane renewable electricity)?

LNBR led SUCRE (Sugarcane Renewable Electricity), a five-year project funded by the Global Environment Facility through the United Nations Development Programme to increase the supply of low-GHG electricity through the generation of bioelectricity from straw. SUCRE is a legacy from 2015 to 2020.

How do government subsidies help energy storage enterprises?

Government subsidies alleviate the financial constraints of energy storage enterprises. Government subsidies promote R&D investment in energy storage enterprises. Differentiated subsidy strategies can generate higher TFP improvement returns. Government subsidies are an important means to guide the development of the energy storage industry.

Do government subsidies improve TFP of energy storage enterprises?

Government subsidies improve the TFP of energy storage enterprises. The government's "picking winners" subsidy strategy is effective. Government subsidies alleviate the financial constraints of energy storage enterprises. Government subsidies promote R&D investment in energy storage enterprises.

Do government subsidies affect the R&D of large-scale energy storage projects?

Government subsidies may have a stronger effect on the R&D of large-scale ESEs. Currently, the energy storage projects show a trend of continuous scale-up, and large ESEs are more likely to construct large-scale "wind power + PV + energy storage" projects.
