## Overview

---

What is a populated 20ft NWI liquid-cooling energy storage container?

\*Specification of Battery Rack The populated 20ft NWI liquid-cooling energy storage container is an integrated high energy density system, which consists of battery rack system (280Ah LFP cell), BMS (battery management system), FSS (fire suppression system), thermal management system and auxiliary distribution system.

What is a lithium phosphate battery system?

The system is built with long-life cycle lithium iron phosphate batteries, known for their high safety and durability, making it a reliable choice for renewable energy generation, voltage frequency regulation, and energy storage in industrial parks or commercial buildings.

What is energy storage container?

SCU uses standard battery modules, PCS modules, BMS, EMS, and other systems to form standard containers to build large-scale grid-side energy storage projects.

What is a mobile energy storage system?

On the construction site, there is no grid power, and the mobile energy storage is used for power supply. During a power outage, stored electricity can be used to continue operations without interruptions. Maximum safety utilizing the safe type of LFP battery (LiFePO<sub>4</sub>) combined with an intelligent 3-level battery management system (BMS);
