

# The reason why Congo does not use base station communications

## Overview

---

Is the Democratic Republic of the Congo lagging behind in telecommunications?

Compared to the United States, the Democratic Republic of the Congo is massively lagging behind in the development of telecommunications. Under the country code +243, there were a total of 49.86 million connections in 2023. Among them were 49.80 million mobile phones, which corresponds to an average of 0.49 per person.

How many people in the Congo have broadband?

Values above 100 percent mean that, on average, every inhabitant has more than one connection. The Democratic Republic of the Congo is lagging behind in the expansion of broadband internet connections. Around 31 percent of all residents have access to the internet.

How fast is the Internet in the Democratic Republic of the Congo?

The Democratic Republic of the Congo is lagging behind in the expansion of broadband internet connections. Around 31 percent of all residents have access to the internet. Around 0 percent have their own fast internet connection, which is at least faster than the former ISDN (more than 256 kbit/s).

Why is transportation important in Congo?

The organization of the transportation network is of crucial importance to Congo, a country of continental dimensions, rich economic resources, and limited maritime access. Congo's generally poor transportation infrastructure is a major factor in its economic underdevelopment, a situation exacerbated by years of civil conflict.

## The reason why Congo does not use base station communications

---

### Base Stations

Jul 23, 2025 · The present-day tele-space is incomplete without the base stations as these constitute an important part of the modern-day scheme ...

---

### What is a base station and how are 4G/5G ...

Aug 16, 2022 · Base station is a stationary trans-receiver that serves as the primary hub for connectivity of wireless device communication.
