

# The world s tallest wind power system

## Overview

---

On November 17, against the backdrop of the majestic Yarlha Shampo Snow Mountain, the China Huadian Corporation's Wind Power Project in Qonggyai County - whose highest turbine installation point sits at an altitude of 5,370 meters - was officially connected to the grid. Which country has installed the world's largest wind turbine?

China has installed an 18-megawatt (MW) offshore wind turbine - the world's largest by power rating - in Guangdong province. State-owned power generator manufacturer Dongfang Electric Corporation completed the installation of the massive wind turbine at a coastal test base in Shantou on June 5.

Is the world's largest wind turbine going green?

The MySE 16-260 in its turbine field. (China Three Gorges Corporation) News about switching to greener energy sources is always good news, and this certainly counts: The world's largest wind turbine constructed to date is now up and running and contributing to the power grid in China.

Is China achieving a breakthrough in wind power development at ultra-high altitudes?

[Photo/Xinhua] LHASA -- China has achieved another breakthrough in wind power development at ultra-high altitudes, with the world's highest wind power project in Xizang autonomous region generating over 22 million kWh of electricity as of Tuesday.

Which wind farm project has the highest nacelle?

This aerial drone photo taken on Oct 22, 2024 shows a view of the wind farm project with the highest nacelle at an altitude of 5,305 meters in Baxoi county, Southwest China's Xizang autonomous region. [Photo/Xinhua]
