

# **Ukrainian outdoor wind power base station enterprise**

## Overview

---

Which region of Ukraine has the most wind power plants?

The northeastern regions of Ukraine have the greatest potential for wind power plants, with an average wind speed exceeding 7 m/s. Before the full-scale invasion, Ukraine had 34 wind power plants with 699 wind turbines generating electricity at an average capacity of 3.5 MW.

Can Ukraine develop offshore wind energy in the Black Sea?

The recovery and development of renewables will require significant private investments, but there is a basis for them: according to the World Bank, Ukraine has one of the best technical potentials for the development of offshore wind energy in the Black Sea among all the countries of the Black Sea region.

Where are most renewable power plants installed in Ukraine?

Most renewable capacities currently installed in the country are concentrated in the southern and southeastern regions of Ukraine. According to various experts' estimates, as of August 2022, 30-40% of renewable power plants in these regions, or about 1.1-1.5 GW of installed capacity, have already been affected.

How many MW is a wind farm in Kyiv?

Danish wind developer Vestas A/S and Ukraine's DTEK Renewables are adding nearly 400 MW of new capacity to a wind farm they've already built between Mykolaiv and Odessa, about 400 kilometres south of Kyiv. The partners have been running the 114-MW Tyligulska I facility—in a dangerous war zone—since the spring of 2023, Vestas said in a release.
