Why should you choose gensets equipped with uninterruptible power supplies (UPS)?

We offer integrated and customised systems that meet your electricity needs, thanks in particular to gensets equipped with Uninterruptible Power Supplies (UPS). Our dynamic high-performance UPS systems meet the demand for a continuous, stable and high-quality power supply, capable of correcting all your power supply failures immediately.

Why do you need a 3-phase uninterruptible power supply (UPS)?

With its compact design and easy installation, a UPS is an essential investment for uninterrupted productivity and peace of mind. A 3-phase uninterruptible power supply (UPS) plays a vital role in data centers, edge computing environments, or commercial or industrial applications where uptime and data integrity are critical.

How does an uninterruptible power supply work?

The uninterruptible power supplies have e.g. an adjustable maximum buffer time to protect the battery and the unit protects the battery from going into a deep discharge. Draining the battery all the way down can damage it in a very short period of time, especially if this occurs multiple times.
