

Uninterruptible power supply for oxygen pump

Overview

Can a battery backup power supply run an oxygen concentrator?

That means a UPS battery backup power supply of this sort would only power a oxygen concentrator for about 20 minutes. Since the size of battery backup power supply required has to be so large in order to run an oxygen concentrator, alternative methods of getting oxygen would be a better option.

How many watts does an oxygen concentrator use?

The motor inside the concentrator runs continually so that it has an average of 480 running watts. The largest UPS you might buy from somewhere like Best Buy or Staples may contain about 160 watt hours of battery capacity. That means a UPS battery backup power supply of this sort would only power a oxygen concentrator for about 20 minutes.

What should I do if I need a portable oxygen concentrator?

We would recommend you ask your oxygen supply company to supply you some extra oxygen bottles that you can have on hand in case of an emergency. Another alternative is having a portable concentrator, which would work as a short term solution.

How much electricity does A DeVilbiss oxygen concentrator use?

An DeVilbiss oxygen concentrator and a Trilogy Vent, used simultaneously, could consume approximately 500 Watts an hour. The DeVilbiss oxygen concentrator consumes about 310W an hour and the Trilogy Vent consumes about 200W each hour.
