

Uninterruptible power supply manufacturer for Brussels data center

Overview

Why do you need a 3-phase uninterruptible power supply (UPS)?

With its compact design and easy installation, a UPS is an essential investment for uninterrupted productivity and peace of mind. A 3-phase uninterruptible power supply (UPS) plays a vital role in data centers, edge computing environments, or commercial or industrial applications where uptime and data integrity are critical.

Why do data centers need a scalable UPS system?

Any fluctuation in performance can have a large impact on a data center provider, which is why we've created efficient, scalable UPS systems for data centers designed to deliver the right amount of power within milliseconds of power loss. Modular Application of Mitsubishi Electric's 9900D UPS.

What is a Mitsubishi Electric uninterruptible power supply?

Mitsubishi Electric Uninterruptible Power Supplies are designed to protect and secure customer data 24/7/365. Uninterruptible power supply systems are a core component of mission-critical data center infrastructures. At Mitsubishi Electric, we understand the risks associated with downtime in data centers – both to your finances and your reputation.

Why should you choose gensets equipped with uninterruptible power supplies (UPS)?

We offer integrated and customised systems that meet your electricity needs, thanks in particular to gensets equipped with Uninterruptible Power Supplies (UPS). Our dynamic high-performance UPS systems meet the demand for a continuous, stable and high-quality power supply, capable of correcting all your power supply failures immediately.
