

Vanuatu power generation side energy storage policy

Overview

How has Vanuatu changed its energy policy?

Revision of previous policy?

: The updated NERM acts as the national energy policy. Since it was launched, Vanuatu's economy and energy sector have continued to develop. External events, such as Cyclone Pam in early-2015, have also shaped how energy sector policies and priorities are conceived.

What does the updated Nerm mean for Vanuatu's energy sector?

The updated NERM acts as the national energy policy. Since it was launched, Vanuatu's economy and energy sector have continued to develop. External events, such as Cyclone Pam in early-2015, have also shaped how energy sector policies and priorities are conceived. The purpose of this document is to update the NERM to reflect recent developments.

What is the focus of energy sector planning in Vanuatu?

Energy sector planning that is supported by appropriate regulations appears to be focusing only on the supply of electricity in urban centres through UNELCO and the importation of petroleum fuels. Currently there is no National Energy Policy Framework that guides and directs energy sector development in Vanuatu.

How can Vanuatu improve electricity access?

Increase electricity access by public institutions (on- and off-grid): 100% by 2020 and 100% by 2030 from 54%. Through the updated NERM, the Government wants to reinforce that cooking fuels are an important form of energy use in Vanuatu, and an area where improvements can be made.
