

# **Venezuela sodium sulfur battery energy storage container supplier**

## Overview

---

What energy storage container solutions does SCU offer?

SCU provides 500kwh to 2mwh energy storage container solutions. Power up your business with reliable energy solutions. Say goodbye to high energy costs and hello to smarter solutions with us.

What is a containerized NaS battery system?

We supply containerized NAS battery systems: one standard 20-ft container has 1.45 MWh energy capacity. The compact form enables easy transportation and quick installation at our customers' sites. Containers can be stacked to reduce an installation footprint. Containers have been tested for self-extinguishing capabilities and mechanical stability.

Where can NaS batteries be deployed?

NAS batteries can be deployed in all climate zones, in extreme cold as well as in extreme heat, without supplementary air conditioning equipment. All raw materials used in NAS batteries are abundantly found on earth. There are no issues with the supply chain or price volatility. NAS batteries require only minimal preventive maintenance.

What is energy storage container?

SCU uses standard battery modules, PCS modules, BMS, EMS, and other systems to form standard containers to build large-scale grid-side energy storage projects.
