

Victoria Hospital Solar System Project

Overview

Why did Latrobe Regional Hospital choose RACV solar?

Latrobe Regional Hospital in Traralgon came to RACV Solar to help reduce their carbon footprint and reduce strain on the local grid. After seeing the system we installed at Sale Hospital, which was the largest solar system on a Victorian hospital at the time, they felt confident trusting us to take care of this critical project.

How can health facilities benefit from a solar system?

Additionally, solar programs reduce carbon emissions and air pollution, minimising the impact of Victoria's healthcare system on the environment. Energy efficiency initiatives can help reduce health facilities' energy consumption and operating costs, leading to long-term savings.

How many solar panels will be installed at Frankston Hospital?

Nearly 1,600 solar panels will be installed on the roof of the hospital and surrounding buildings, supplying the energy needed to light and power hospital equipment in this all-electric facility. In addition, the Victorian Government has committed to using 100% renewable electricity from 2025 for all its operations, including Frankston Hospital.

What is the Thomas Embling Hospital solar program?

As of April 2024, initiatives have been selected for implementation in the Thomas Embling Hospital, Dental Health Services Victoria, and the Barwon South-West and Gippsland regions. The solar program involves engaging with health services to identify opportunities to install solar.
