

Vietnam Ho Chi Minh City wind solar and energy storage integration

Overview

When is solar & storage live Vietnam 2025?

HO CHI MINH CITY, Vietnam, July 3, 2025 /PRNewswire/ -- Vietnam takes a bold step forward in its clean energy transition as the country's largest renewable energy event, Solar & Storage Live Vietnam 2025, returns to Ho Chi Minh City on 9-10 July 2025 at SKY Expo Vietnam.

How has Vietnam benefited from solar & wind power development?

Vietnam has orchestrated the first stage of its solar and wind power development using FITs and a supportive overall investment environment. Government incentives and enabling policies that have boosted energy availability while avoiding upward pressure on electricity prices have gained public support.

Why is Vietnam a good place to invest in solar and wind power?

Vietnam has led the uptake of solar and wind power capacity in ASEAN since 2019. Government commitment and public support are found to be key drivers. Feed-in tariffs can strongly incentivize industry take-off. Policy certainty and preparation of transmission systems are important.

Can solar and wind power meet Vietnam's near-term energy needs?

Contrastingly, solar and wind power's lower capital requirements and faster development timelines are well-suited to meeting Vietnam's near-term energy needs. These projects can be implemented within months and with high certainty, unlike gas projects, which typically take four to five years to complete once financed.
