

# **Wall-mounted solar power and booster water pump**

## Overview

---

What is a solar powered water pump?

A solar powered water pump is an eco-friendly, off-grid solution that uses solar energy to move water from wells, rivers, ponds, or tanks—without needing electricity or fuel. Perfect for farms, homes, and remote areas, these pumps are powered by photovoltaic panels and come in both surface and submersible options.

What is a solar pump booster in the SQB series?

The solar pump booster in the SQB series is used for pumping water from wells and ponds, increasing water pipe pressure, garden irrigation, and automatic water supply systems. It features a simple construction, economical design, high durability, and reliability. Voltage: DC 24V, DC 48V, DC 72V. Power: 210W~750W. Max. head: 60m.

What is Grundfos water pump?

Grundfos is a company that offers a complete line of low-maintenance, solar powered water pumps and related components. These products include solar inverters and AC /DC power blenders, delivering flexibility for irrigation and agriculture water supply and boosting applications. Grundfos is known for its advanced and energy efficient pressure boosting systems for boosting of clean water.

Should you switch to a solar water pump?

For large-scale irrigation, go for 24V or 48V systems. If you're living off-grid, farming, or just tired of high electricity bills, switching to a solar powered water pump is one of the smartest moves you can make. It's sustainable, affordable, and effective. You don't need to be a technician to set one up.

## Wall-mounted solar power and booster water pump
