

Waterproof folding containers for chemical plants

Overview

How many litres can a chemical storage container hold?

The IBC for liquid chemicals has a 500 to 3,000 litre capacity. This chemical storage container has a base constructed from galvanized steel, aluminium or stainless steel, depending on your needs. We offer many customization options for the chemical container to ensure it adapts perfectly to your specifications and the constraints of your sector.

Why do chemical plants use GRP containers?

Our GRP containers in chemical plants meet all the requirements of the latest technology, operational safety and official regulations. They are impressive due to their low weight and their high mechanical and thermal resistance to hostile external and internal influences.

What is a goodpack intermediate bulk container (IBC)?

Managing the safe transport and storage of chemicals is a major challenge for businesses. It requires solutions that not only ensure safety and compliance with regulations but also align with sustainability and cost-efficiency goals. Goodpack's Intermediate Bulk Containers (IBCs) provide an innovative, sustainable approach to meet these demands.

What is a reusable container?

All reusable containers are suitable for the transport, storage and further processing of paste-like, liquid or temperature controlled media. Protect your media from external influences and create a safe working environment. All container systems are made of 100% high-grade stainless steel.
