

West Asia Energy Storage Project

Overview

What is a regional energy storage system (Ta)?

The proposed regional TA aims to facilitate the scale up of battery energy storage system (BESS) deployment in the ADB's DMCs to enable the high penetration of renewable energy development, achieving the climate change goals in faster pace.

Is Asia-Pacific a key player in the energy transition?

The global shift toward clean energy is accelerating, with the Asia-Pacific region emerging as a key player in the energy transition. In recent years, countries across the region have rapidly expanded their deployment of renewable energy, particularly solar.

Why do we need energy storage solutions?

This trend is driven by falling technology costs, supportive policies, and growing access to international climate finance. However, the variable nature of solar and wind energy has underscored the critical need for energy storage solutions to ensure grid stability and reliability.
