What is the solar energy landscape in Europe?

The solar energy landscape in Europe has rapidly evolved, positioning the continent as a significant player in global renewable energy production. As of 2023, the European Union (EU) boasts a total installed solar capacity of approximately 263 gigawatts (GW), making it the second-highest region in the world for solar power capacity.

Are rural areas a good source of solar energy in Europe?

Europe's rural regions present significant opportunities for solar energy development, with approximately 78% of the untapped solar potential located in these areas. These regions, which account for 83% of the EU's landmass, already contribute nearly three-quarters (72%) of Europe's renewable electricity production.

Does Europe need a cleaner and more flexible power system?

Europe urgently needs a cleaner and more flexible power system. IRENA: Solar the fastest growing energy source worldwide This March, solar came to the rescue of Europe's high power prices thanks to sunnier days and increased capacity, with 65 GW added in 2024 alone.
