

What are the energy storage power stations in Togo

Overview

How many power plants are there in Togo?

Currently, seven power plants are operated with fossil fuels in Togo with a cumulated capacity of ~260 MW. These so-called thermal power plants use thermal gas, thermal oil and thermal DDO to produce electrical energy. Most of the power plants of this type are managed by the grid operator and utility CEET.

Who manages the power plants in Togo?

Most of the power plants of this type are managed by the grid operator and utility CEET. The largest two run by CEET are located in the capital Lomé and have a capacity of 12MW each. The largest thermal power plant in Togo is operated by Contour Global, a private company and has a capacity of 100 MW.

How much energy does Togo use?

In total, electricity supply of 1.162 GWh is thus achieved through distribution losses, resulting in a final electricity consumption of 876 GWh. Togo's total energy consumption is divided into three sectors. The largest share, 76%, is in the use of biomass, followed by petroleum products 20%. Only 4% of energy is used in the form of electricity.

Where is the largest thermal power plant in Togo?

The largest two run by CEET are located in the capital Lomé and have a capacity of 12MW each. The largest thermal power plant in Togo is operated by Contour Global, a private company and has a capacity of 100 MW. The power plant can be operated with natural gas or heavy fuel oil as main fuel and diesel as reserve.

What are the energy storage power stations in Togo

Construction begins on 25MW solar-plus ...

May 1, 2025 · Construction of a utility-scale solar-plus-storage project is now underway in northern Togo. The 25 MW Dapong solar project will include ...

Togo energy storage: Impressive 55 MW Project Gets Unique ...

Oct 21, 2025 · A Cornerstone of Togo's National Energy Strategy with Togo energy storage This 55 MW project is not an isolated effort but a key component of Togo's broader vision for a ...
