

What are the green base stations in Port Moresby

Overview

What is the Port Moresby power grid development project?

The Port Moresby Power Grid Development Project is subdivided into six subprojects that entail significant investments into power, transmission, distribution, and generation. The project proposes the construction of new facilities and the rehabilitation of existing facilities serving Port Moresby.

What is the Port Moresby energy project?

The project will upgrade and extend the transmission and distribution grid, improve substation capacity, as well as upgrade and rehabilitate two hydropower plants. It is aimed at reducing fossil fuel consumption, increasing access to energy supply and improving network reliability in the Port Moresby power grid.

How can Australia improve the Port Moresby grid?

Additionally, Australia has committed to enhancing the Port Moresby grid by installing new capacitor banks and transformers at crucial substations. These interventions are designed to strengthen power stability and mitigate instances of power outages within the region.

Where will subprojects take place in Port Moresby?

Subprojects (i) to (iv) will take place in and around the Port Moresby area in the National Capital District (NCD). Subprojects (v) and (vi) are respectively located about 20km and 35km northeast of Port Moresby along the Laloki River valley. ADB Loan L2998/2999: Port Moresby Power Grid Development Project.
