

What battery cabinet manufacturers are there in the Democratic Republic of Congo

Overview

Can the Democratic Republic of the Congo produce lithium-ion battery cathode precursor materials?

London and Kinshasa, November 24, 2021 - The Democratic Republic of the Congo (DRC) can leverage its abundant cobalt resources and hydroelectric power to become a low-cost and low-emissions producer of lithium-ion battery cathode precursor materials.

Why is the Democratic Republic of the Congo so important?

Although China has invested capital into multiple mineral-rich nations, the Democratic Republic of the Congo (DRC) stands out because of its vital role in the cobalt market. The DRC produces 80 percent of the world's cobalt—Chinese state-owned enterprises and policy banks control 80 percent of the total output.

Why did China invest in the DRC?

The funds—which would be equally split between mining and infrastructure development—established China as a major investor in the DRC, especially at a time when the DRC's gross domestic product was only \$19.79 billion. At its core, the deal exchanged natural resources for infrastructure spending.

How much cobalt does the DRC produce?

The DRC produces 80 percent of the world's cobalt—Chinese state-owned enterprises and policy banks control 80 percent of the total output. Of the 10 largest cobalt mines in the world, nine are in the DRC's southern Katanga region.
