Overview

What is a battery pack?

A battery pack is the largest and most complex unit of a battery system. It is an integrated assembly of multiple battery modules or individual cells arranged in a specific configuration to meet the voltage and energy requirements of a particular application.

What is the difference between a battery cell and a pack?

A battery cell is a battery's basic unit, whereas a battery module is a collection of battery cells. A pack, on the other hand, consists of one or more modules as well as any other components required for operation, such as enclosure, connectors, and control circuitry. The following comparison chart demonstrates this in greater detail:.
