

# What is the inverter voltage in Stockholm

## Overview

---

The voltage used in Stockholm is 230V and the frequency is 50Hz. If this is the same in your own country, you don't need a voltage converter when travelling to Stockholm. What is the voltage in Sweden?

Just like the rest of Europe, the voltage in Sweden is 230 volts and the frequency is 50 Hz. Sweden has standardized on type F sockets and plugs. Type C and type E plugs can also be used thanks to their compatibility with type F sockets.

What is the standard voltage in Stockholm?

The standard voltage in Stockholm is 230V at a frequency of 50Hz. Do I need a power plug adaptor in Stockholm?

If the plug shape in Stockholm is different to your home country you might need to get a travel adapter.

What voltage is 230V in Sweden?

In Sweden, the voltage is 230V and the frequency is 50Hz. Make sure your electronic devices are compatible with this voltage and frequency. It is advisable to carry a converter for type C and F plugs for use with local power outlets. If your devices do not support 230V, consider using a transformer to avoid damage.

What type of plug is used in Sweden?

In Sweden, types C and F are the official standards. Like almost all Continental European countries, Sweden has standardized on the German plug and socket system. What is the mains voltage in Sweden?

Just like the rest of Europe, the voltage in Sweden is 230 volts and the frequency is 50 Hz. Sweden has standardized on type F sockets and plugs.
