

What to do if the 60v battery cabinet is too far away

Overview

How do you keep a lithium battery safe?

These strategies reflect Vade Battery's commitment to delivering safe, high-performance power solutions for businesses and consumers alike. A few key takeaways include keeping lithium batteries at a moderate state of charge during storage, placing them in cool and well-ventilated spaces, and checking them periodically for signs of wear or damage.

How do I protect my RC batteries from fire?

For smaller batteries or individual cells, consider using the original packaging or a dedicated fire-resistant battery storage case for added protection. Lithium polymer (LiPo) batteries, commonly used in RC hobbies, are often kept in special LiPo safety bags or metal ammo boxes as a precaution against fire.

How do you protect a battery?

For healthy batteries, make sure their contacts can't accidentally touch metal objects in storage. A common best practice is to cover exposed terminals with electrical tape or use protective caps (especially for loose cells) to prevent accidental short-circuits.

What should you do if a lithium battery goes bad?

A few key takeaways include keeping lithium batteries at a moderate state of charge during storage, placing them in cool and well-ventilated spaces, and checking them periodically for signs of wear or damage. Even a small amount of attention now can spare you from sudden battery failure or worse in the future.
