

# What to know when inspecting solar curtain walls

## Overview

---

Do curtain walls & skylights need to be tested?

Curtain walls and skylights have to be tested for the full gamut of design requirements at a suitable testing facility following international standards.

How often should a curtain wall be inspected?

You should inspect your curtain wall every six months. In busy or harsh environments, check every three months. Regular inspections help you find problems early and keep your building safe. What cleaning products work best for curtain walls?

Use mild soap or gentle detergent with a soft cloth. Avoid strong acids, harsh chemicals, or abrasive tools.

How do I know if my curtain wall system is bad?

You need to inspect your curtain wall system often to keep it safe and working well. Start by looking at the wall from a distance. Use binoculars to spot cracks, drip marks, or loose joints. Move closer to check any areas that look suspicious. Look for these signs of trouble: Leaks at frame corners or near gaskets.

How to maintain a curtain wall in 2025?

Look for these warning signs: If you see any of these, contact an expert right away. Maintain your curtain wall in 2025 with regular inspections, cleaning, and timely repairs to prevent leaks, save energy, and extend building life.
