

Where are Cuban outdoor power supplies produced

Overview

Where does Cuba's energy supply come from?

Cuba's energy supply mainly comes from oil products, accounting for over 80% of power generation.

What is the electricity and power supply like in Cuba?

View on Amazon.com → [What's the electricity and power supply like in Cuba?](#)

Although Cuba officially runs on 110V, many of the more modern hotels have 110/220V (dual voltage) outlets to cater to the lucrative European market.

How is energy used in Cuba?

Total energy supply (TES) includes all the energy produced in or imported to a country, minus that which is exported or stored. It represents all the energy required to supply end users in the country.

What type of power outlet does Cuba use?

Cuba uses both Type A/B and Type C power outlets. Some hotels will use one type and others another, although plenty use both, sometimes even in the same room! As a result, you'll have to pack the proper adapter to recharge your devices while on the road.
