Overview

What is the first government-level photovoltaic + energy storage project in Mexico?

This is the first government-level photovoltaic + energy storage project in Mexico. We collaborated with CFE (Mexican Federal Electricity Commission) to design and supply the BESS (Battery Energy Storage System) for this project.

Can battery energy storage systems be integrated in Baja California Sur?

This paper aims to assess the long-term integration of Battery Energy Storage Systems (BESS) in Baja California Sur (BCS), Mexico. First, the electrical grid in BCS is parametrized and modeled to reproduce the actual operational conditions before evaluating long-term expansion scenarios.

How much battery does a generator need in Mexico?

The required reserve in Mexico is about 5 % per generator unit (i.e., storage), with a typical 15 min operation. According to , a battery could provide 4 cycles per day, providing an ancillary service such as frequency control or ramps.

Who formulated Mexico's grid expansion plans?

Despite its recently liberalized market, Mexico's grid expansion plans are formulated by its independent systems operator (CENACE) , and approved by the Energy Secretariat (SENER), before being published as the official national grid-planning guiding document, PRODESEN .
