

Which battery should I choose for the inverter

Overview

Do inverters need batteries?

For most residential and small commercial setups, the traditional battery and power inverter combo is the preferred choice to ensure continuous power supply during blackouts. So, while some inverter types do not require batteries, if your priority is uninterrupted backup power, investing in a quality battery in inverter system is essential.

What are the best batteries for inverter systems?

The best batteries for inverter systems are usually “deep-cycle” batteries. This means they are designed to be discharged deeply and recharged many times without getting damaged. Car batteries, for instance, are “starting” batteries and aren’t built for this kind of deep, slow drain. Here are the most common types you’ll find for inverters: 1.
