Overview

What is a battery energy storage system (BESS) system integrator & EPC solutions provider?

As a battery energy storage system (BESS) systems integrator and EPC solutions provider, we combine the latest global Tier 1 battery and inverter technology to engineer a comprehensive BESS solution that is scalable and delivers guaranteed performance.

Why do we need a Bess system?

By doing so, it ensures that energy resources are utilized more efficiently, minimizing waste and improving the overall efficiency of energy production and distribution. The BESS also offers significant operational flexibility, allowing it to adapt to varying energy demands and supply conditions quickly and effectively.

What is a Bess solution?

WEG's world class BESS solutions are capable of either co-location with variable renewable sources (PV or Wind) to reduce intermittency in supply, as well as stand-alone applications to address a host of reliability and stability issues on the grid.

What are the benefits of using Bess with gas engines?

Pairing BESS with gas engines can enhance performance and provide cheaper, cleaner, and a more resilient power solution. In addition, the inclusion of a flywheel inertia solution can provide additional system stability, fast response, and optimisation of battery life.
