

# **Wholesale bess storage system in Japan**

## Overview

---

Does Japan need battery energy storage?

**A Growing Need for Energy Storage** The increasing generation of renewables on the Japanese grid has led to various support policies and CAPEX subsidy schemes to support the deployment of grid-scale Battery Energy Storage (BESS).

How many GW of Bess will Japan have by 2030?

However, it said it is aiming to operate 1GW of grid-scale BESS by 2030. While the installed BESS capacity in Japan is still limited, it is growing due to subsidy programs among other reasons. Companies including Mitsubishi HC Capital Energy, Renewable Japan, and Sinanen have, so far, entered the market among others.

Can Eku energy sell Hirohara Bess & eshi in Japan?

Kentaro Ono says that Hirohara BESS' tolling deal and the Eshi project's LTDA contract are two of three commercialisation pathways Eku Energy sees potential for in Japan. The third is a full merchant model. Ono says the developer wants to hold a diversified portfolio representing different risk and reward appetites for investment.

How does Bess work?

With that, the company's platform, which it developed jointly with the AI-start-up ExaWizards, now works to optimize profitability of BESS facilities by deciding when to trade in the wholesale and when in the balancing market. The system creates daily bidding, as well as charging and discharging, plans.
