

# Wholesale bess storage system in Myanmar

## Overview

---

Does Solis have an off-grid battery energy storage system in Myanmar?

Solar tech leader Solis is making waves in Southeast Asia with its new energy solution — an off-grid Battery Energy Storage System (BESS) in Myanmar.

What is a Bess Solar System?

According to Solis, BESS is built to deliver efficient electricity from 8 a.m. to 7:30 p.m., even in less-than-ideal conditions. The system has a 450 kilowatt-peak solar capacity and six hybrid inverters — with a total output of 300 kilowatts — that help convert energy into usable electricity. BESS also boasts 668 kilowatt-hours of battery storage.

What is Bess & how does it work?

BESS is tailored for homes and businesses. It's built to drastically cut pollution by eliminating generator dependence. The system is also designed to reduce grid charging to near zero. Through a Power Purchase Agreement model, BESS supports long-term affordability and sustainability.

What is a Bess power purchase agreement?

The system is also designed to reduce grid charging to near zero. Through a Power Purchase Agreement model, BESS supports long-term affordability and sustainability. This enables users to benefit from stable and low-cost electricity over time, setting a new benchmark for green energy access in the country.
