

Wind Solar and Energy Storage Financing Scheme

Overview

How does solar project financing work?

Solar projects leverage project finance, using cashflows to repay loans and distribute risks, making renewable energy developments more feasible. Over the past few decades, the landscape of renewable energy project financing has evolved significantly.

What is the capacity investment scheme?

The Capacity Investment Scheme (CIS) is an Australian Government revenue underwriting scheme to accelerate investment in: renewable energy generation (generation), such as wind and solar clean dispatchable capacity (dispatchable), such as battery storage. The scheme provides a long-term revenue safety net that decreases financial risk for investors.

Is green energy finance a good investment?

Clean energy finance in the venture space is not without risk, but the potential returns and environmental impact make it an increasingly attractive sector for forward-thinking investors. Another key trend is democratising access to green energy investment.

How do community-owned energy schemes work?

Community-owned energy schemes often reinvest profits locally, creating a virtuous circle of economic and environmental benefit. These models raise capital and build public support and awareness, both essential to a successful renewable energy transition. Access to capital remains a major barrier to energy use in emerging markets.
